Image Description

One for all – and for everything: The kitchen is the centre of family life. It is where living meets cooking and work meets play. It is also where things can get a bit more chaotic at times, making it particularly beneficial when a modern look and high functionality ensure clear lines. This is established through the casual lightness created by the open, variable Frame Rack shelves between the wall unit and worktop. General well-being is enhanced by the great convenience introduced into the kitchen by an elevated dishwasher, sensor controlled plinth lighting and the C-DRIVE electronic opening system that enables even little cooccupants to easily open and close the wall unit. Since the passage door to the pantry is “camouflaged” as a tall unit, the overall effect is one of even more space.
